

NATURE'S SUNSHINE

Butcher's Broom

Vegan

Kosher

Non-GMO

GOOD FOR

Cardiovascular system

Blood

Connective Tissue

SIZE **100 Capsules**

ITEM # **135**

SERVING **2**

SUPPLY **25 days**

DIRECTIONS FOR USE Take 2 capsules with a meal twice daily.

— How the Key Ingredients Work

Butcher's Broom is a time-honored herb from the Mediterranean that helps keep your veins toned and your circulation flowing smoothly. Its naturally occurring plant compounds work to support healthy blood flow, reduce puffiness, and help your legs feel lighter and more comfortable every day.

Butcher's Broom – Venous Tone Support — Think of your veins like garden hoses — they work best when they have good tone and don't get floppy. Butcher's Broom helps the walls of your veins stay firm and responsive, which supports healthy blood flow back up from your legs toward your heart, easing that heavy, tired feeling.

Butcher's Broom – Leg Comfort and Swelling — If your legs ever feel puffy or swollen after a long day on your feet, Butcher's Broom may help. Research shows it can help reduce fluid buildup in the lower legs, making them feel lighter and more comfortable — a benefit that has been confirmed in multiple clinical studies on people with circulation concerns.

Butcher's Broom – Capillary Health — Tiny blood vessels called capillaries can sometimes become leaky, letting fluid seep into surrounding tissue and causing puffiness. Butcher's Broom helps keep those small vessels tight and less permeable, so fluid stays where it belongs and your tissues don't become waterlogged or swollen.

Butcher's Broom – Circulation in Chronic Venous

Insufficiency — Chronic venous insufficiency is a condition where veins struggle to push blood back up from the legs efficiently. Butcher's Broom has been studied specifically for this concern, with clinical trials showing it can help reduce leg heaviness, swelling, and discomfort associated with sluggish venous circulation.

Butcher's Broom – Blood Pressure Balance When Standing

— Some people feel dizzy or lightheaded when they stand up quickly because their blood pressure drops momentarily. Butcher's Broom has been studied for this issue — known as orthostatic hypotension — because it helps blood vessels constrict appropriately, supporting steadier blood pressure as you move from sitting to standing.

Butcher's Broom – Skin and Cellulite Support

— Butcher's Broom is referenced in dermatology literature for its role in supporting skin appearance, particularly in relation to cellulite. By helping veins stay toned and reducing fluid retention in tissues beneath the skin, it may support a smoother, healthier-looking skin surface over time.

Butcher's Broom – Anti-Edema Action

— Edema — the medical word for excess fluid trapped in body tissues — can make legs, ankles, and feet feel puffy and uncomfortable. Butcher's Broom's plant compounds have demonstrated anti-edema effects in research, helping the body manage fluid balance more effectively and keeping tissues from holding onto excess water.

Butcher's Broom – Tissue Integrity Support

— Healthy connective tissue helps keep skin firm and veins structurally sound. Research suggests that Butcher's Broom's active compounds may help protect the enzymes that break down connective tissue from becoming overactive, which supports the overall integrity and resilience of skin and vascular tissue.
