

NATURE'S SUNSHINE

Grapine With Protectors (SynerPro)

GOOD FOR

Cardiovascular system

Brain

Nervous System

SIZE **90 tablets**

ITEM # **1750**

SERVING **1**

SUPPLY **30 days**

DIRECTIONS FOR USE Take 1 tablet with a meal three times daily.

— How the Key Ingredients Work

Grapine with Protectors (SynerPro) brings together grape seed, pine bark, and a carefully chosen team of fruits and vegetables to deliver broad antioxidant support and help your body stay strong from the inside out. Each ingredient plays its own role, and together they work as a team to help protect your cells, support your heart and circulation, and keep your natural defenses running at their best.

Grape Seed Extract — The star of this formula, grape seed is packed with natural plant compounds called proanthocyanidins that act as powerful free-radical fighters. Studies show grape seed extract supports healthy blood pressure, helps keep arteries flexible and clear, and promotes healthy circulation — making it a cornerstone of everyday cardiovascular and antioxidant care.

Pine Bark Extract — Sourced from the bark of the French maritime pine, this extract is rich in the same family of protective plant compounds found in grape seed. Research shows it supports healthy blood pressure, helps the body manage everyday inflammation, and provides strong antioxidant defense — while also being studied for joint comfort and respiratory wellness.

Vitamin C — One of the body's most essential nutrients, vitamin C is a water-soluble antioxidant that helps protect cells from everyday oxidative stress. It also plays a key role in building collagen — the structural protein that keeps skin, joints, and connective tissue healthy — and helps the body absorb iron from plant-based foods more effectively.

Hesperidin — A natural flavonoid found in citrus peel, hesperidin is well studied for its ability to support healthy arteries and circulation. Research shows it helps protect the inner lining of blood vessels, supports healthy blood pressure, and acts as a free-radical scavenger — making it a valuable partner to the grape and pine bark extracts in this formula.

Broccoli — Broccoli brings sulforaphane — one of nature's most studied protective plant compounds — to this blend. Human studies show broccoli helps the body ramp up its own built-in antioxidant systems, supports healthy blood pressure, and may help the body maintain balanced blood sugar levels. It also shows promise for joint comfort in early research.

Turmeric — Turmeric's golden color comes from curcumin, a well-researched polyphenol with strong antioxidant activity. Multiple human studies confirm curcumin raises the body's total antioxidant capacity and supports healthy levels of the body's own protective enzymes. It has also been studied for digestive comfort and as a natural way to support the body's everyday inflammatory response.

Tomato — Tomatoes are the richest food source of lycopene, a carotenoid antioxidant that research shows is especially effective at neutralizing harmful free radicals. Clinical studies link lycopene to healthier arteries, better blood pressure readings, and reduced oxidative damage to fats in the bloodstream — all important markers of long-term cardiovascular wellness.
