SIZE **32 fl. oz.**ITEM # **310**SERVING **15 mL**SUPPLY **31 days**

DIRECTIONS FOR USE Take 1 tablespoon (15 mL) twice daily with a meal. Keep lid tightly closed and refrigerate after opening. Shake well before using.

— How the Key Ingredients Work

Ionic Minerals with Açai brings together time-honored mineral-rich compounds and vibrant fruit antioxidants in one easy formula. Each ingredient plays a real role in helping your body stay balanced, energized, and protected day after day.

Fulvic Acid — Drawn from ancient organic matter deep in the earth, fulvic acid is a natural helper that supports your cells' ability to produce energy, fights everyday oxidative stress, and has long been used in traditional wellness traditions as a revitalizing, fatigue-fighting tonic. It also supports healthy blood sugar balance through antioxidant pathways.

Açai Berry — This deep-purple Amazonian superfruit is loaded with natural plant pigments called anthocyanins that act as powerful antioxidants in the body. Studies show açai can raise your blood's overall antioxidant capacity, support healthy blood vessels, help manage blood sugar levels, and even help athletes push harder and recover faster.

Grape — Grapes — and especially their seeds — are packed with polyphenols like resveratrol and proanthocyanidins that have been studied in dozens of clinical trials. Research confirms these compounds support healthy blood pressure, protect the lining of blood vessels, help keep blood flowing smoothly, and provide robust antioxidant defense throughout the body.

Sodium — Sodium is your body's chief electrolyte outside your cells, and it does far more than flavor your food. It regulates fluid balance, helps maintain healthy blood pressure, keeps your nerves firing correctly, and is especially important during exercise when sweat losses can throw your hydration off balance.

Tartaric Acid (2,3-Dihydroxybutanedioic Acid) — Naturally found in grapes, tamarind, and many other fruits, tartaric acid is an alpha-hydroxy acid with antioxidant and metal-chelating properties. Traditional medicine systems have used tartaric acid-rich plants for digestive comfort, and it is also recognized for supporting skin moisture and barrier health when applied topically.
