

NATURE'S SUNSHINE

Paw Paw

Kosher

Non-GMO

GOOD FOR

Immune System

Blood

SIZE **180 capsules**

ITEM # **515**

SERVING **2**

SUPPLY **30 days**

DIRECTIONS FOR USE Take 2 capsules with food three times daily. Do not exceed recommended serving size.

— How the Key Ingredients Work

Paw Paw brings together the unique power of *Asimina triloba* — a fruit native to North America — to help your body maintain healthy energy levels, support your immune system, and keep your cells working the way they should. This formula draws on the plant's naturally occurring bioactive compounds to give your body the kind of everyday support it needs to feel its best.

Paw Paw — Cellular Energy Support — Paw Paw contains naturally occurring acetogenins — compounds unique to *Asimina triloba* — that have been studied for their effects on how cells manage and regulate energy. Supporting healthy cellular metabolism may help your body feel more balanced and energized from the inside out.

Paw Paw — Mitochondrial Health — The bioactive compounds found in Paw Paw have been researched for their influence on cellular energy regulation, including how cells produce and use energy at a fundamental level. Keeping that process running smoothly is key to feeling your best day after day.

Paw Paw — Abnormal Cell Growth Control — One of the most studied aspects of *Asimina triloba* is its acetogenins, which researchers have examined for their role in helping the body manage abnormal cell growth. This makes Paw Paw a uniquely interesting botanical in the world of natural cellular health support.

Paw Paw — Immune System Support — A well-functioning immune system starts at the cellular level. Paw Paw's naturally occurring compounds have been studied for their effects on cellular metabolism and energy regulation, both of which play an important role in keeping your immune defenses strong and responsive.

Paw Paw — Antioxidant Defense — Paw Paw is rich in antioxidant compounds that help your body fight back against everyday oxidative stress. These natural defenders work to neutralize harmful free radicals, helping protect your cells and tissues so your body can keep running at its best.

Paw Paw — Blood & Circulatory Support — Healthy blood and circulation depend on cells that are working efficiently and protected from oxidative damage. Paw Paw's bioactive compounds support the kind of cellular health that keeps your blood and circulatory system functioning the way nature intended.

Paw Paw — Chronic Fatigue & Low Energy — Feeling run-down or persistently tired can often trace back to how well your cells are producing and managing energy. Paw Paw has been studied for its effects on cellular energy regulation, making it a natural choice for those looking to support their energy levels over time.

Paw Paw — Unique North American Botanical — Unlike tropical papaya or graviola — fruits that are sometimes confused with it — *Asimina triloba* is a true North American native. Its distinct acetogenin profile sets it apart from other plants in its family, offering a one-of-a-kind source of natural cellular support.

Paw Paw — Free Radical Protection — The antioxidant activity found in Paw Paw helps your body stand up to the daily wear and tear caused by free radicals. By helping to reduce oxidative stress, Paw Paw supports the long-term health of your cells, tissues, and overall wellness.
